DETAILED ACTION

Allowable Subject Matter

1. Claims 1-15 are allowed.
2. The following is an examiner's statement of reasons for allowance:

The prior art neither discloses nor makes obvious the combination set forth in the claims by not disclosing the check valve up stream of the filter at the inlet end of the motor housing in combination with the other limitations of independent claims 1, 3, 13 and 15. Also, the prior art fails to teach the housing having recesses and a filter detector that has bearing feet aligned with and moveable into the recesses depending on the lack of or presence of the filter in combination with the other limitations of independent claims 1, 3, 13 and 15. Prior art further fails to teach that the housing defines guide recesses and the filter detector includes guide pegs moveable into the guide recesses and that the filter detector is H-shaped with a fuel passage formed in the cross bar of the H-shape and that the valve engager includes a valve stem also located on the cross bar of the H-shaped filter detector in combination with the other limitations of independent claims 3. The prior art also fails to disclose the inclusion of a ledge formed on the housing facing the inlet end cap which engages with the perimeter of the filter in combination with the other limitations of independent claims 13 and 15.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
